Contents of volume 1031

Information for Contributors vii

Structure of the inverted hexagonal (H_{II}) phase, and non-lamellar phase transitions of lipids
J.M. Seddon (U.K.) 1

Mechanisms of membrane protein turnover
J.F. Hare (U.S.A.) 71

Cell surface receptors for extracellular matrix components
S.K. Akiyama, K. Nagata and K.M. Yamada (U.S.A., Japan) 91

Ionization of phospholipids and phospholipid-supported interfacial lateral diffusion of protons in membrane model systems
J.-F. Tocanne and J. Teissié (France) 111

The actions of melittin on membranes
C.E. Dempsey (U.K.) 143

Receptor-effector coupling by G proteins
L. Birnbaumer, J. Abramowitz and A.M. Brown (U.S.A.) 163

Alteration of intracellular traffic by monensin; mechanism, specificity and relationship to toxicity
H.H. Mollenhauer, D.J. Morré and L.D. Rowe (U.S.A.) 225

Chloride channels of biological membranes
F. Franciolini and A. Petris (U.S.A., Italy) 247

Biochemical and molecular aspects of the hepatic uptake of organic anions
C. Tiribelli, G.C. Lunazzi and G.L. Sottocasa (Italy) 261

Gangliosides and synaptic transmission
P.D. Thomas and G.J. Brewer (India, U.S.A.) 277

The homeoviscous theory of adaptation applied to excitable membranes: A critical evaluation
A.G. Macdonald (U.K.) 291

Membrane electrostatics
G. Cevc (F.R.G.) 311

Regulation of the plasma membrane potential in hepatocytes – mechanism and physiological significance
S.K. Moule and J.D. McGivan (U.K.) 383

Author Index 400
